## **DETAILED ACTION**

### **Continued Examination under 37 CFR 1.114**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/04/2010 has been entered. Claims 1, 11-12 and 17 are amended. Claim 10 is cancelled. Claims 1-6, 8-9 and 11-20 are currently pending.
2. Amendment received on 05/24/2010 was entered into record. Claims 1, 12 and 17 were amended. Claim 7 was cancelled.
3. Applicant's submission filed on 11/25/2009 was entered. No claim was amended.
4. Amendment received on 04/30/2009 was entered into record. Claims 1, 12 and 17 were amended.
5. Applicant's submission filed on 02/09/2009 was entered. The amendment to the specification to change the title of application was reviewed and accepted. Claims 1, 12 and 17 were amended.
6. Amendment received on 08/20/2008 has been entered into record. Claims 1, 12-13 and 17-20 are amended.

### **Priority**

7. This application has claimed priority from provisional application 60528643 filed on 12/10/2003. The filing date is 03/30/2004.

### **Reasons for Allowance**

8. Claims 1-6, 8-9 and 11-20 are allowed as Amendment received on 11/04/2010.

The following is an examiner's statement of reasons for allowance:

The closest prior arts of record issued to Rowley et al. (US 7277957 B2), Saulpaugh et al. (US 7072967 B1) and Barnett et al. (US 7290048 B1) fail to teach or suggest "an apparatus comprising: an object assembly module to reconstruct flows representing objects being transmitted on a network from packets, the packets associated with a document that includes the objects, wherein the document is captured based on a capture rule that specifies the objects, and wherein a determination is made as to whether to discard or to store the objects of the document; an object classification module to determine a type of content of the objects and to reconstruct the objects from the flows; an object store module to store the objects, wherein a location for storing the objects is determined based at least in part on the type of content for each of the objects, wherein the object store module comprises a content store to store the objects and a tag store to index the objects stored in the object store; and a user interface to enable a user to search objects stored in the object store module, wherein the objects are searched based on a query, which includes search criteria used to identify selected objects that match the search criteria, wherein a particular search is scheduled for a recurring time interval and includes a particular search query with selected terms, and wherein certain results of the particular search trigger an alarm in a form of an e- mail message to be sent to an administrator".

Applicant has amended significantly as per Amendment received on 11/04/2010, particularly with the limitation combination of "wherein the object store module comprises a content store to store the objects and a tag store to index the objects stored in the object store"

Art Unit: 2444

and “wherein a particular search is scheduled for a recurring time interval and includes a particular search query with selected terms, and wherein certain results of the particular search trigger an alarm in a form of an e- mail message to be sent to an administrator”.

Examiner has reviewed the independent claim language as amended above in light of applicant's published specification and original claim language. Examiner has reviewed the claim rejections and applied prior arts, i.e. Rowley, Saulpaugh and Barnett as per Office Action mailed on 08/04/2010. Examiner has performed a further search on independent claim language. Examiner has found that Rowley, Saulpaugh and Barnett are still the closest prior arts on the claimed invention as presented in Amendment received on 11/04/2010. However, Rowley, Saulpaugh and Barnett together do not disclose in full the specific feature combination as presented in independent claim language of Amendment received on 11/04/2010. Independent claim 1, 12 and 17 are to be allowed.

The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2444
